Software Engineer

Full Stack | Cloud-Native Systems | DevOps Engineering

Software Engineer with 5+ years of experience designing and building scalable full-stack applications, cloud-native platforms, AI-enabled systems, and distributed backend services. Experienced across TypeScript, Node.js, Go, React, AWS, Docker, Kubernetes, and CI/CD automation, with strengths in backend engineering, cloud-native architecture, DevOps practices, and generative AI applications using AWS Bedrock. Contributed to production SaaS platforms including SkyU and GrantReady, delivering scalable microservices, deployment automation, and AI-powered workflow solutions for Australian organisations.

07.2026 – Present	Software Engineer	Brokernote (Melbourne, AU)
03.2026 – 06.2026	Software Engineer Team Lead	GrantReady (Melbourne, AU)
07.2024 – 06.2026	Software Engineer Consultant	Insighture (Melbourne, AU)
06.2023 – 07.2024	Software Engineer	Insighture (Colombo, SL)
07.2021 – 07.2022	Trainee Software Engineer	99x (Colombo, SL)

Key achievements

- ★ Core contributor to [SkyU](#), a production cloud-native automation platform, helping deliver scalable backend systems and full-stack platform capabilities for multiple clients.
- ★ Designed and implemented API-driven microservices and distributed backend services using modern cloud-native architectural patterns.
- ★ Built and optimised CI/CD pipelines, deployment workflows, and containerised cloud infrastructure using Docker, Kubernetes, and GitHub Actions.
- ★ Developed full-stack platform features using React and TypeScript, integrating frontend applications with backend services and cloud infrastructure.
- ★ Led development of an AI-powered RDTI claims platform, implementing AWS Bedrock Knowledge Bases, RAG architecture, and secure multi-tenant cloud-native application workflows.
- ★ Awarded Most Outstanding Intern ([99x](#)) for exceptional technical contribution, ownership, and engineering initiative.
- ★ Published author ([Documon](#), ICSCCM 2023, SPIE), demonstrating strong technical communication, systems thinking, and research capability.

Technical Skills

- ★ **Languages:** TypeScript, JavaScript, Go, Python, C#, Java, C++, Dafny, Ruby, SQL
- ★ **Frontend:** React, Next.js, TypeScript, HTML5, CSS3
- ★ **Backend:** Node.js, NestJS, .NET (C#), Gin, REST APIs, Microservices
- ★ **Cloud & DevOps:** AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Infrastructure Automation, Linux
- ★ **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB
- ★ **Architecture & Engineering:** Distributed Systems, System Design, API Design, Scalable Web Applications, Cloud-Native Architecture
- ★ **Tools & Practices:** Git, GitHub, Agile Development, Scrum, Testing, Code Reviews, CI/CD Pipelines
- ★ **AI & Automation:** AWS Bedrock, Bedrock Knowledge Bases, Retrieval-Augmented Generation (RAG), Anthropic Claude, GitHub Copilot, AI-assisted engineering workflows

Professional Experience

Software Engineer

[Brokernote](#) (AI-Driven InsurTech Startup)

06.2026 – Present

Melbourne (AU) | Contract

- ★ Led the design and development of cloud-native platform capabilities supporting AI-driven insurance broking workflows, compliance processes, and operational efficiency.
- ★ Designed and implemented scalable backend services, APIs, and distributed system architecture using TypeScript, Node.js, Python, and modern cloud engineering practices.
- ★ Built AI-powered platform capabilities by integrating Large Language Models (LLMs) and agentic workflows into business processes to improve automation and decision-making.
- ★ Drove technical architecture, infrastructure, and platform engineering initiatives, contributing to system scalability, reliability, security, and maintainability.
- ★ Developed Infrastructure as Code, deployment automation, and CI/CD pipelines to support reliable cloud-native delivery and operational excellence.
- ★ Partnered directly with founders and cross-functional stakeholders to shape product direction, evaluate technical trade-offs, and deliver scalable production solutions.

Software Engineer | Team Lead

[GrantReady](#) (Industry Project / AI-Powered RDTI Claims Platform)

03.2026 – 06.2026

Melbourne (AU) | Contract

- ★ Led the design and development of an AI-enabled SaaS platform supporting the preparation and submission of Australian R&D Tax Incentive (RDTI) claims.
- ★ Designed and implemented Retrieval-Augmented Generation (RAG) workflows using AWS Bedrock Knowledge Bases and Anthropic Claude to provide source-grounded document intelligence and grant drafting capabilities.
- ★ Developed full-stack platform features using React, Next.js, TypeScript, Node.js, Python, SQL, and REST-based microservices architecture.
- ★ Designed secure multi-tenant application workflows including role-based access controls, audit logging, document management, and compliance-focused approval processes.
- ★ Built cloud-native deployment workflows using AWS, Docker, CloudFormation scripts, GitHub Actions, and modern CI/CD practices.
- ★ Collaborated across product, engineering, and domain stakeholders to deliver a production-grade AI platform focused on scalability, security, governance, and regulatory compliance.

Software Engineer | Consultant

[Insighture](#) (Cloud, AI, and DevOps, accelerating growth)

07.2024 - 06.2026

Melbourne (AU) | Contract

- ★ Contributed to the ongoing development and optimisation of SkyU, supporting scalable cloud-native platform capabilities and DevOps automation initiatives.
- ★ Developed backend services and API-driven microservices using Node.js, Go, AWS, and modern distributed architectural patterns.
- ★ Contributed to frontend feature development using React and TypeScript within cloud-native application environments.
- ★ Participated in CI/CD automation, deployment workflows, containerisation, and engineering process improvements using Docker and GitHub Actions.
- ★ Integrated AI-driven document processing capabilities using AWS Bedrock within production systems.
- ★ Collaborated within agile engineering teams to improve scalability, deployment reliability, and engineering workflows.

Software Engineer

[Insighture](#) (Cloud, AI, and DevOps, accelerating growth)

06.2023 – 07.2024

Colombo (SL) | Permanent

Head hunted after graduation as part of a team put together to create and take a product (SkyU) to market (Target audience being in Melbourne Australia) within a fixed time.

- ★ Core developer on SkyU, contributing to the design and delivery of scalable full-stack applications and cloud-native backend systems.
- ★ Developed backend services and API-driven microservices using Node.js, NestJS, Go, AWS, and cloud-native architectural patterns.
- ★ Developed frontend features using React and TypeScript, integrating user-facing applications with backend services and cloud infrastructure components.
- ★ Contributed to systems design discussions focused on scalability, maintainability, deployment efficiency, and platform reliability.
- ★ Participated in CI/CD automation, deployment optimisation, containerisation, and engineering process improvements within agile product environments.
- ★ Collaborated closely with cross-functional teams to deliver scalable and maintainable platform capabilities for Australian clients.
- ★ Contributed to taking a product from concept to market within a fixed delivery timeline.

Trainee Software Engineer

[99x](#) (Product Engineering)

07.2021 – 07.2022

Colombo (SL) | Internship

- ★ Awarded Most Outstanding Intern (2021) for exceptional technical contribution and ownership.
- ★ Contributed to full-stack development of internal systems using React, Node.js, Java, and AWS.
- ★ Built and integrated features using serverless architectures, improving scalability and maintainability.
- ★ Developed interactive 3D web components using Three.js for internal applications.

Education & Training

- ★ **Master of IT (MSc)** – RMIT University, Melbourne (2024 - 2026).
 - Specialisation: Cloud Computing, Distributed Systems, and Big Data Processing.
- ★ **BSc. (Hons) in Software Engineering** – University of Lancashire, United Kingdom (2019 - 2023)
 - BSc. First Class (Hons) in Software Engineering (85.4 APM)
 - Valedictorian and the Gold Medallist (class of 2023)
 - Batch Top (2019, 2020, 2021 & 2023)

Additional

- ★ IELTS Overall Band Score: 8.0
- ★ Competitive Long-distance swimmer with 19+ years of training experience.
- ★ Certified ILS Lifeguard
- ★ Interests: Generative art, 3D modelling, creative coding, fitness and music.
